

Thank you for reviewing our client portfolio

We present this as a summarized review of our activities, capabilities and accomplishments. We appreciate your interest.

RePower Canada Inc. began operations in November 2008. Our core focus is to provide energy audits and assessments of commercial/industrial facilities. Other areas of expertise include consulting on energy related decisions from green marketing to commodity purchasing and project management.

Over the last three years, RePower Canada has grown significantly. Our company resolution is to provide an unbiased approach to energy reduction and conservation.

We believe our client list reflects a demand for *"Excellence in Energy"*; our unique process and approach to understanding the building's energy environment.

RePower Canada has a policy of facts, truth and transparency; we are not affiliated with any manufacturers, distributors or resellers.

We have presented you a summary of our client list in confidence as we do not provide this information publicly. We only ask that this list and its contents are treated with the same privacy and respect given to your clients.

We estimate to date, we have helped our clients reduce their electricity demand by almost 1 Megawatt. Additionally, we have signed solar PV projects currently under review by OPA potentially adding nearly a Megawatt in generated watts. RePower Canada was awarded the Green Community Award in 2009 by the Barrie Chamber of Commerce and we have been nominated for the 2011 Green Community Award.

Tier 1 Client – Active account or project work

In this sample of Tier 1 accounts, each began with our energy assessment and continued with an Excellence in Energy Action Plan (EEAP). Some are completed or currently underway.

THE KOREA TIMES
